

## 1. What are your interests?

The things that I have interest is discovering things in life and adventuring freely without any distraction.

## 2. What are your strengths? What are your weaknesses?

For me as a person my strength would be able to communicate with others confidently and voice what I want to say. My weaknesses would be not being confident in myself and my own decision.

3. What domains of knowledge did you most excel at in SHS?

That would be in English I pretty much excel than other in terms of english and speaking in front of a crowd.

4. Where do you want to work someday? How much money do you have to spend on your education? Is this something you can finance on your own or do you need to take on a loan? How much loan are you willing to take on?

My dream job would be a mechanical or electrical engineering. Based on my research there will be a lot of expenses once I track my way of field of expertise. I think I would need to take a loan because it needs a hefty lot of money. As much as I need in order to graduate and achieve being on what I want to become.

5. Have you decided on a course to take up in college?

The course that I want to take is mechanical or electrical engineering.

6. Do you have any career fields in mind?

My dream career field is being able to become an electrical or mechanical engineer.

7. Which colleges offer programs in your fields of interest?

As of now there is none in my mind but maybe in the future I would be able to decide.

8. How much tuition do you have to prepare? What other costs would be involved (e.g., dormitory, boarding house, transportation, books, and supplies)?

According to what I found it it will require me to put 10.000 - 14.000 Pesos. The other cost would be in dormitory, all school supplies and transportation to my destined school.

9. What are the starting salaries in your career or field of interest?

The average starting salary of an engineer in the Philippines is 31.760 Pesos.

10. If you are taking a loan, how long will it take for you to finish paying it off?

According to my research an engineer student usually takes 5 to 10 years to pay off all their student loans so I would say that it would also be the same for me as I would take 5 to 10 years to pay of my student loans.

THANK YOU
